Summary

Full Stack Developer proficient in both the MEAN and MERN stacks, with extensive experience building scalable and user-centric web applications. Skilled in designing robust REST APIs, implementing responsive design, and applying clean architecture principles to deliver high-performance, production-ready solutions. A fast and adaptive learner with strong critical-thinking abilities, supported by a legal background from Ain Shams University that adds a distinctive edge in analytical reasoning and structured communication.

Experience

Frontend Developer Intern *Digital Egypt Pioneers Institute (DEPI) | Apr 2024 - Oct2024*

Developed responsive user interfaces for web applications using Angular and TypeScript, ensuring 100% mobile compatibility. Collaborated with a cross-functional team to integrate RESTful APIs, improving data retrieval speed by optimizing front end logic. Utilized Git for version control, managing code branches and resolving conflicts efficiently

Skills

Languages: JavaScript (ES6+), TypeScript.

Frontend: React.js, Angular, Redux Toolkit, HTML5, CSS3, Tailwind CSS, Bootstrap.

Backend: Node.js, Express.js.

Database: MongoDB, Mongoose.

Tools: Git, GitHub, Postman, Vercel.

Education

Bachelor of Law

Ain Shams University

Sep2020 – May2024

Grade: Good

Certificates

Software Engineer: Ministry of Communications and Information technology

Front-End Developer: Next Academy

Project

Lotus haven | E-commerce

Description: Engineered a full-featured e-commerce frontend using Angular, implementing dynamic product filtering and a responsive shopping cart.
Technologies: Angular, TypeScript, Bootstrap, Sass.
Link: https://lotus-haven.netlify.app

Insta | Backend Development

Description: Architected a scalable REST API using Node**.**js and Express to handle user authentication, posts, and real-time data updates.
Technologies: Node.js, Express, MongoDB.
Link: Code available upon request

Big shop | E-commerce

Description: Developed a dynamic e-commerce interface using React, leveraging Redux Toolkit for efficient global state management.
Technologies: React, Bootstrap, Redux Toolkit.
Link: https://github.com/AmrkhaledGamal/Big-shop

Amr | Portfolio

Description: Designed and deployed a personal portfolio website using Angular and Bootstrap to showcase projects and technical skills.
Technologies: Angular, Bootstrap, TypeScript.
Link: https://amr-khaled.vercel.app

Vanilla JavaScript Projects (Game Station & Special Design)

Description: Engineered multiple interactive web applications using pure JavaScript, demonstrating mastery of DOM manipulation, and advanced CSS animations.
Technologies: JavaScript (ES6+), HTML5, CSS3, Tailwind.
Link: https://github.com/AmrkhaledGamal

Movie

Description: Created a movie discovery app by integrating the TMDB API with React, featuring dynamic search and details pages.
Technologies: React, Movie DB.
